Two small privacy bags (non-transparent) may be placed inside each clear bag with your household garbage.

Household Hazardous Waste

In the interest of safety and the environment, household hazardous waste cannot be included with your regular waste. These items can cause fires, harm victims coming in contact, cause damage and also cause damage to machinery. Many common household products contain chemicals that can be harmful to humans, animals, and the environment. When such products are no longer needed, they become household hazardous waste. **Household Hazardous Waste Items: antifreeze, batteries, cleaners, paint & paint products, pesticides & herbicides, aerosol cans, propane tanks, fire extinguishers, fertilizers, etc..**
